

Do you want to increase your technicians' efficiency during installations?

Do you want to minimise installation costs and at the same time be sure that your customers will be 100% satisfied with the undertaken work?

Conteg, the leading Czech manufacturer of comprehensive solutions for data centres, offers you a one-day professional training session aimed at a detailed understanding and mastering of the procedures needed to correctly install and use products designed for data centres and server rooms.

Trainers from the ranks of the product specialists at Conteg will lead a group (max. 6 participants) of your technicians during a demonstration installation of the following products:

- the installation and connection of PREMIUM racks in to the row
- the assembly of air separation frames
- the assembly of vertical PDU
- the assembly of high density wire management (HDWM)
- the installation of Top Duct and OptiWay pathway system
- the assembly of a cold aisle, including sliding doors and blind panels

The material can be supplemented or replaced as needed to include the installation and assembly of a modular cold aisle, the installation and configuration of RAMOS, the installation and configuration of the Access control system and others.

Duration of the training session: 1 day (from 9 am to 5 pm)

Date: by arrangement

Venue: Pelhřimov – the Conteg training centre

Price: 1-2 participants – 196 EUR/day/company

3-6 participants – 236 EUR/day/company

Refreshments will be provided during the training session.

The participating company will receive a CCIP (Conteg Certificated Installation Partner) certificate to show that the company's technicians have been trained in the installation of Conteg comprehensive solutions for data centres, one set of "Conteg ToolBox" tools + a small gift for each participant which will be useful during every installation.

If you are interested, you can register at skoleni@conteg.cz.
